## Glass Shower System BO 300

The full glass shower system BO 300 offers a wide range of swinging or folding door models.

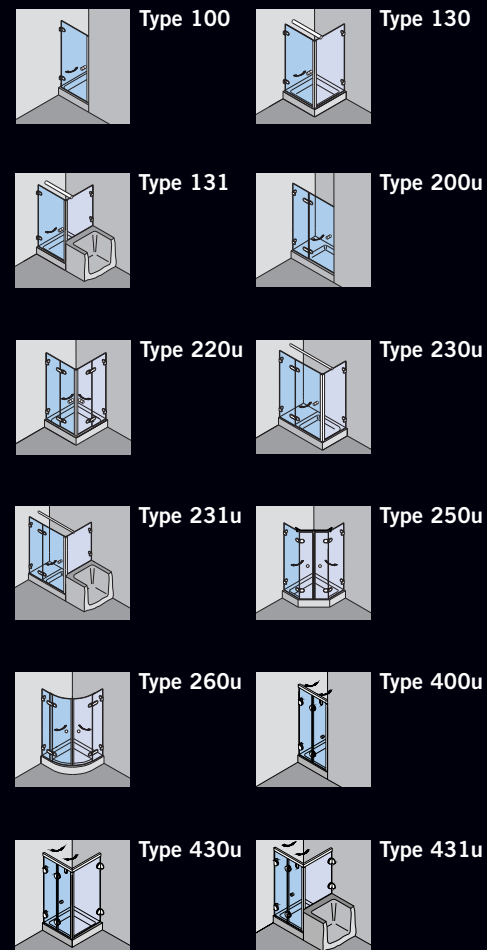

Side panels and doors with overlapping glass-glass joints keep water

from spraying out without any additional seals and at the same time allow for adjustment over a wide range during installations. Slim fittings increase the effect of transparency.

### Fitting

Brass or zinc die-casting for galvanized, powder coated or anodised surface finishes.

### Glass Shower System BO 315

Elegance meets functionality. The BO 315 system's highlight is the countersunk fitting, allowing the shower doors to be operated without additional hardware within the shower.

Countersunk fittings also make this system easy to clean due to the smooth finish between the fitting and the inner surface of the glass.

## Glass Shower System BO 415

The BO 415 system uses a rectangular shaped hinge with a countersunk fixing to give a smooth finish between the fitting and the inner surface of the glass. This minimises the hardware within the shower and allows for easy cleaning.

## Glass Shower System BH 200

The BH 200 system is distinguished by its rising mechanism and uncompromising full glass look. The BH 200 fittings

lift the doors a few millimetres when opened making them ideal for installations without a shower tray.

**Fitting**  
The doors are guided and held in place by two slide units.

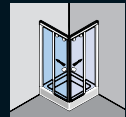

## Glass Shower System SO 730

The sliding door system does not require floor profiles, therefore eliminating a potential dirt trap. The overlapping of door and fixed glass leaf increases the overall

impression without the need for sealing profiles. The design of the sliding door mechanism, protects it against spraying water giving it a longer life.

## **Glass Shower Hinge BO 305**

The BO 305 hinge series has a free swing mechanism and variants for glass to wall, flush glass to glass and overlapping glass door solutions.

For fixed panels of 8mm glass and door panels of 6mm glass thickness.

## **Glass Shower Hinge BO 410**

The BO 410 hinge series has a free swing mechanism and variants for glass to wall, flush glass to glass and overlapping glass door solutions.

For panels of either 6mm or 8mm glass thickness.
